THE CALEDONIAN PICNIC AND WILD WEST SHOW.

The band will hold an important meeting to-night at their hall to make the final arrangements for the greatest show Beaumont has seen for many a day. There will be some features that have not yet been placed on the program, and the management has secured the services of a noted Vaudeville Vocalist, who will sing popular songs during the intervals. The band will no doubt be enlarged on this occasion by several players of prominence, among which we may mention Mr. Stump Double Bell Euphonium soloist.

REPORTERS EXCLUDED FROM A TRIAL.

Fittsfield, Mass., July 23.—During the Fosburg trial to-day Judge Stevens ordered that reporters of the New York Journal, World and Herald be excluded because each had published details of the case held to be prejudicial. The judge said he would punish the individual writers if able to discover their identity.

MACARONI WHEAT CROP RUINED.

Washington, July 23.—Secretary of Agriculture Wilson says that the Macaroni wheat crop of the West is ruined by heat. This is a great disappointment to the Secretary as he had imported large quantities of seed from Africa in order to place the product on a firm footing here.

STRIKERS ENJOINED.

Seneca Falls, N. Y., July 23.—Justice Dunwell has issued a sweeping injunction forbidding the machinists' union from picketing, or in any way interfering with the men who will take their places.

STRUCK FOR LEMONADE.

Pittsburg, Pa., July 23.—Fifty carpenters struck to-day because the contractor employing them forbade them drink lemonade during work hours. The contractor says lemonade knocks out workmen this hot weather.

WEATHER FORECAST.

East Texas.—Local thunderstorms Tuesday and probably Wednesday.
Louisiana.—Occasional thunderstorms Tuesday and probably Wednesday.

DEADLY HEAT AT ST. JOE.

St. Joseph, Mo., July 23.—By ten o'clock this morning heat had already caused four more deaths.

TEACHERS SAIL FOR MANILA.

San Francisco, July 23.—538 school teachers, of whom 145 are women, sailed to-day on a transport for Manila. They are appointed for three years. It costs the government three hundred dollars to transport each one.

BANK STATEMENT CALLED FOR.

Washington, July 23.—Comptroller of the Currency, Dawes, issued a call to-day for a statement of the condition of national banks at the close of business on July fifteenth.

THE ICE MEN STRIKE.

Columbus, O., July 23.—All the ice wagon drivers struck this morning, demanding a ten hour day. An ice famine is threatened.

To Stockholders of Guber Oil Co.

The Directors take pleasure in announcing that a contract has been entered into with Mr. John Wynne for the drilling of a well for the Guber Oil Company on subdivision six of lot six, block 21, Gladys City, on same block with Columbia Oil Co's well. Active drilling will begin to-day.

GOBER OIL COMPANY,

WALTER S. BRUSH, Secretary,
J. D. GOBER, President.
Beaumont, July 22, 1901.

THE REAL ESTATE MARKET.

Real estate is advancing in price, especially building lots for residence property. There is, however, not such a strong demand for outside property as there was a few weeks ago. Real estate dealers generally unite in the prediction that prices will go much higher and say that the outlook is good.

Mr. C. T. Heisl said this morning: "There is a good demand for town property, especially residence lots; there is a strong demand for good rice lands and lands with fair oil prospects command good prices. There are many inquiries for both town and outside lands, and prices will continue to be good. The outlook is fine."

Mr. G. A. Meyer said: "While prices are not so good as they were a few weeks ago, they are still firm. But this may be expected at this season. However, I deal only in my own lands. The outlook for the future of Beaumont is very good, according to my observations."

Mr. Moore of Moore, Hathaway and company, said that the price of oil lands had somewhat declined within the past week, but this may be only temporary. Another gusher will likely send up prices.

BARN DESTROYED.

Last Saturday the barn of the Jefferson County Rice company on Taylor's Bayou was totally destroyed, together with its contents.

Mosquitoes had become so numerous that they were about to eat up the mules and sundries were built in the barn Friday for the purposes of driving off the mosquitoes. It took fire from this Saturday morning and burned to the ground. Over one hundred bales of hay, several sacks of rice, harness and farm machinery was stored in the building. The loss is about \$500.

BUILDING PERMITS ISSUED.

The following building permits have been issued:

Jeff Chaisson Townsite company, two story frame houses on lots 18 and 39, block 1, Pennsylvania avenue, cost \$3300.

H. B. Fall, two story frame office building on lot 4, block 19, Liberty avenue, to cost \$2,000.

LANDS IN LIBERTY COUNTY.

Mr. S. S. Foscoe of Liberty, who has been in the city several days, returned home this morning. He states that there is not as much activity in land matters as there was a few months ago. "Only about one-tenth of the land in the county, but no great rush. There 'Land sells at from \$15 to \$25 an acre, and there is not much for sale at that price. There is some immigration to the county, but no great rush. There is no excitement about oil, though there are some prospects around."

COUNTY COURT.

A rather interesting suit was tried in the county court this morning in which the jury failed to agree and were discharged. J. Anslee had sued the Texas and New Orleans railroad for \$200 for killing a mule. The railroad company argued that they were not responsible for killing stock in towns where they could not build fences. The plaintiffs contend that their responsibility is the same as any

Mr. John A. Ettler, architect, stated to an Enterprise reporter this morning that there was a steady and increasing demand for cottages and that builders were endeavoring to supply that want. The orders for plans for cottages were larger than for any other class of buildings, yet there was considerable activity in the construction of larger residence houses and business houses, judging from the plans asked for. He said, however, that the greater demand at present was for cottages. There is considerable work, though, and he was kept busy.

The Dominion government has adopted a new rule in regard to the regulation and reservation of Canadian lands believed to be valuable for petroleum purposes. It supersedes the old rules and is as follows:

"All unappropriated Dominion lands in the Northwest and within the Yukon shall, after July 1, 1901, be open to prospecting for petroleum by any individual or company desiring to do so. In case there should arise any dispute as to whether the lands are or are not unappropriated the question shall be decided by the minister whose decision shall be final. Should oil in paying quantities be discovered by a prospector and such discovery be established to the satisfaction of the minister, an area not exceeding 640 acres, including and surrounding the land upon which the discovery was made, will be sold to the person of company making the discovery at the rate of \$1 an acre, providing such lands are available at the time application is made. Provision is made that a royalty may be levied upon the sales of petroleum, the royalty will then be fixed by an order-in-council."

THE GREAT BAND CONCERT AND WILD WEST SHOW NEXT SATURDAY AND SUNDAY. TWO PERFORMANCES DAILY. DON'T MISS IT.

WELLSVILLE MILLS WORKING. Welsville, O., July 23.—The three mills worked to-day as usual. There was no disturbance of any kind.

THE ATTACK ON THE EMIGRANT TRAIN BY INDIANS. A REALISTIC PRODUCTION WORTH SEEING AT THE WILD WEST SHOW NEXT SATURDAY AND SUNDAY.

Disease Germs

The most dangerous impurities in drinking water are the so-called Disease Germs. The best authorities hold that certain diseases known as Zymotic Diseases are propagated or transmitted by a peculiar of low organisms which find their way into the system through channels of air, food and water. Of these diseases malarial fever, typhoid fever, scarlet fever, cholera and diphtheria are the notable. It is believed by many who have studied these subjects that typhoid fever, scarlet fever and diphtheria will never attack those who habitually use for all purposes properly filtered water. As regards the most dangerous impurities of all disease germs nothing short of an efficient mechanical filter will serve to remove them. They cannot be killed by water boiling under ordinary conditions, for the best authorities (Lex, Sanderson, Tyndall and others) place their death point as high as 230 degrees Fahrenheit. Water boils at 212 degrees, consequently they are left alive and kicking after all ordinary culinary operations.

Buy one of our filters and you are sure it is the only remedy to lead to good health, long life and a certainty of success.
